DISCRIMINATION PROHIBITED—Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Therefore, the Federal financial assistance programs mentioned in this publication, like every program or activity receiving financial assistance from the Department of Health and Human Services, must be operated in compliance with this law.

INTRODUCTION

This is the eleventh edition of the list of special clinical facilities for mentally retarded children published by the U.S. Department of Health and Human Services. In general, the clinics listed can be defined as outpatient medical facilities providing comprehensive evaluation, treatment, or follow-up services primarily to children suspected or diagnosed as being mentally retarded. Each clinic is staffed by an interdisciplinary team and headed by a physician who takes the medical responsibility for all patients seen and who is in attendance at regularly scheduled hours.

This listing was initially developed to facilitate the exchange of new approaches and techniques among these special programs initiated in 1956 under the special Maternal and Child Health provisions of Title V of the Social Security Act. The purpose of the work was to provide help for early detection, diagnosis, and management to families looking for an alternative to institutionalized care for their mentally retarded children. The listing has been considerably expanded to include a range of similarly structured clinical programs with the same objectives. These programs are supported and sponsored by a variety of sources. Morever, many of these programs have added to these objectives specific approaches for the prevention of retardation and for early intervention. In particular, these additions include the responsibility of management, dietary treatment, and followup of infants with metabolic disorders detected through newborn screening.

In developing this revised listing, the Division of Maternal and Child Health and the National Center for Education in Maternal and Child Health have continued to function primarily as reporters. The information about each facility was provided by either the clinic itself or by State Health officials. Inclusion of a facility in this list does not constitute an endorsement, nor has there been an attempt to evaluate either these facilities or the quality of their services.

The directory is arranged geographically by state. Under each state, the facilities are arranged alphabetically by city. For services in a state that is not included in this list, refer to "areas served" under facilities in adjoining states. For assistance in locating services, contact the State Director of Maternal and Child Health or Crippled Children's Services of the State Health Department. They are listed in the appendix. Please note that most clinics are open during the normal business hours (9 am - 5 pm) in the work week—often an appointment is necessary.

We wish to thank the State Maternal and Child Health and Crippled Children's Services Directors for their assistance. Additionally we wish to thank Elaine M. Eklund Associate Director, American Association of University Affiliated Programs for the Developmentally Disabled, for reviewing the manuscript.

Communications concerning this list, including suggestions for changes or additions, should be addressed to:
